Light System*

Apollo-Mini IPL

Apollo Broadband Intense Pulsed Light

Facial rejuvenation • Hair Reduction • Acne Reduction • Vascular Reduction
•Mild to moderate photo damaged skin

The market for non-surgical cosmetic procedures is immense and growing. Aesthetic treatments are among the most profitable. With an estimated 40 million procedures annually, aesthetic procedures will represent a 6 billion dollar market.

Within this upsurge in cosmetic treatments, patient demographics are changing. Mainstream cosmetic procedures have shifted from 60 something retirees to 30-50 year old urban professionals. These active lifestyle patients desire to maximize improvements in skin texture and appearance while minimizing downtime. They are often seeking a more youthful appearance for career advancement or social acceptance.

The Apollo Mini IPL

Discover the Apollo Mini IPL from Sandstone Medical Technologies, LLC. The Apollo Broadband IPL creates a new level of patient and professional satisfaction.

The Apollo Mini IPL provides power and precision to effectively perform aesthetic procedures in the palm of your hand. It is so gentle it can be used to effectively treat even highly sensitive areas around the eyes, neck, chest, and back of the hands without bleeding or anesthesia. Using extended non-ablation technology, patient pain and discomfort are minimized and downtime is virtually eliminated.

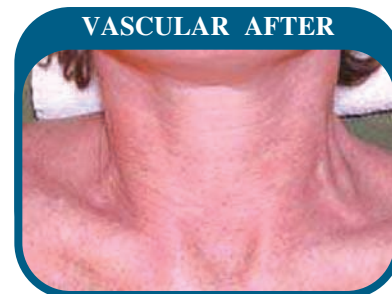

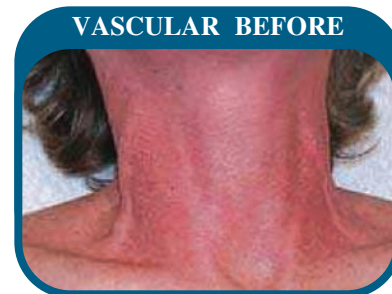

No chemical mixtures or flaky debris, Apollo treatments are fast, neat and clean. With a brief office visit, your patient can have a full photo facial and immediately return to their daily activities – and within 5 days, look years younger with softer, smoother, more radiant skin.

Advantages

- Large spot size
- Lightweight & portability
- Multiple power levels
- No articulating arm

Features

- NO PATIENT DOWNTIME
- SAFE AND EFFICACIOUS
- HIGHER PROFITABILITY
